Olive Oil

Our olive groves are set in the mountains of South West Crete, some 450 m above sea level. Each year between December and January, we harvest the olives by spreading out large nets beneath the trees and then "comb" the olives into these nets. These raked olives are then stored in special olive sacks and, at the end of each day, they are taken for cold pressing. It is the immediacy of the pressing that produces olive oil with an acidity of less than 1%
- EXTRA VRIGIN OLIVE OIL.
Most of our oil is produced for our family, so great care is taken to ensure that we keep it as 'natural' as possible.
The Cretans use olive oil for frying, roasting, and baking - and of course for salads; other oils are never used! Perhaps that is why our Cretan life span is longer than most.
